

# Conical Bottom Tanks

Frontier Conical Bottom Tanks are made from Imported Hexene LLDPE resin having High Density and Low Melt Flow, which makes these ideal to be used as Acid pickling tanks, HCL storage tanks, Sulphuric acid storage tanks or Nitric acid storage tanks. The resin used has high ESCR (Environmental Stress Crack Resistance). This property of the resin enables the chemical storage tank to have maximum possible life. The density and melt flow ensure that the tank has High Chemical Resistance due to closely packed molecules in the resin. Different manufacturers use different resins.

Frontier Chemical tanks are available in different polymers like LDPE, PP, Cross Linked etc. We can also cater to high Temperature storage tanks. Your requirement will determine the kind of polymer to be used.

## Key Features

Heavy duty conical bottom tanks

Conical bottom tanks stored liquid is required in indoor or outdoor installations

Metal structure / stand sold separately

Model	Capacity (Ltr)	Diameter (mm)	Height (mm)
FCB- 500*	500	900	1000
FLC- 1000*	1000	1070	1560
